

Manta Roofing Products Warranty Process Procedures

Getting your Manta Roofing Products warranty is a straightforward process. Just follow these steps:

1. **Certified Applicator Submits Pre-Approval:** Your **Manta Roofing Products Certified Applicator** will submit an online warranty pre-approval form *before* beginning any work on your project.
2. **Manta Roofing Products Approves Application:** We'll review the application. Once approved, we'll assign a unique **warranty registration number** to your project.
3. **Certified Applicator Submits Completion Date:** After the roofing job is finished, your **Certified Applicator** will reply to the automated email they received (when they submitted the pre-approval form) to notify us of the **completion date**.
4. **Warranty Issued After Passing Inspection:** Once your project successfully passes its final inspection, we'll send an **e-copy of your warranty** to be signed by the building owner. Please return the signed copy to Manta Roofing Products to finalize the warranty.
